

SOUTHCO INTRODUCES NEW SPRING-LOADED CONCEALED PULL HANDLE

CONCORDVILLE, Pa., June. 24, 2015 — Southco, Inc., a global leader in engineered access solutions, has recently expanded its popular line of handle and pull styles with the launch of its new spring loaded 67 Concealed Pull. The spring loaded version offers the same flush mount design as the standard 67 series, but features a triggered handle and all-metal construction, providing higher strength and improved industrial design.

The newest edition to the 67 line features a unique O-ring styled handle that stores inside of the housing when not in use. When triggered via simple, push-button operation, the spring loaded 67 automatically releases the handle for easy access, providing a convenient grip for opening doors or panels. Available in multiple color options, the flush-mount design of Southco's Concealed Pull series eliminates catch points and improves overall styling and aesthetics of application design in a wide range of industries including Enclosures, Telecom and Industrial Machinery.

Product Manager James Stroud adds, "Southco's spring loaded 67 Concealed Pull allows for quick, automatic access to the handle, yet hides it from view when not in use. All-metal construction provides increased strength while complementing industrial design, making it an ideal solution for applications where concealed access is necessary."

For more information about the functionality of 67 Concealed Pulls, please visit www.southco.com, e-mail the 24/7 customer service department at southco.com/contact/en, call 610-459-4000 or fax your inquiry to 610-459-4012.

Southco is the leading and trusted global source for engineered access hardware solutions, including a variety of latches, locks, captive fasteners, quick access fasteners, hinges, handles, inserts, electronic access solutions, and other accessories for applications in the networking, telecommunications, computer, automotive, aerospace, mass transit, off-highway/construction, RV/caravan, industrial machinery, marine and HVAC industries.

Southco is passionately focused on delivering customized engineering solutions and global support for its customers. The company aspires to be a virtual engineering center for its customers' engineered access solutions and is committed to providing outstanding quality and overall satisfaction. Southco's promise to its customers is to connect, create and innovate to provide the best solution for every access engineering problem. www.southco.com
