

SOUTHCO EXPANDS ELECTRONIC ROTARY LOCKING LINE WITH NEXT GENERATION MICROPROCESSOR CONTROLLED R4-EM 9 SERIES

CONCORDVILLE, Pa., June 28, 2016 — Southco, Inc., a global leader in engineered access solutions, has recently expanded its successful line of electronic rotary locking solutions with the release of its next generation R4-EM 9 Series Electronic Rotary Latch. The R4-EM 9 Series delivers next generation electronic latching through microprocessor controlled actuation, providing intelligent, reliable electronic access.

The 9 Series features expanded intelligence with microprocessor control of all input and output commands, providing expanded programming capability and customization of latch functionality. This lightweight design incorporates an integrated door sensor and extended housing for tamper resistance, while an integrated trigger sensor provides indisputable lock/unlock status reporting. The 9 Series is available with a “kick out” option that enables lightweight doors and drawers to pop open when the latch is unlocked, and a “pull open” style that detents the cam in the fully closed or open position.

General Manager Steve Spatig adds, “Southco’s R4-EM 9 Series Electronic Rotary Latch incorporates enhanced electronic intelligence along with additional mechanical features, making it an ideal solution for applications that require enhanced remote physical security, such as parcel lockers, medical dispensing equipment and other self-service kiosks.”

For more information about Southco’s complete line of R4-EM Electronic Rotary Latches, please visit www.southco.com, e-mail the 24/7 customer service department at southco.com/contact/en, call 610-459-4000 or fax your inquiry to 610-459-4012.

Southco is the leading and trusted global source for engineered access hardware solutions, including a variety of latches, locks, captive fasteners, quick access fasteners, hinges, handles, inserts, electronic access solutions, and other accessories for applications in the networking, telecommunications, computer, automotive, aerospace, mass transit, off-highway/construction, RV/caravan, industrial machinery, marine and HVAC industries.

Southco is passionately focused on delivering customized engineering solutions and global support for its customers. The company aspires to be a virtual engineering center for its customers’ engineered access solutions and is committed to providing outstanding quality and overall satisfaction. Southco’s promise to its customers is to connect, create and innovate to provide the best solution for every access engineering problem. www.southco.com
