

NEW COUNTERBALANCE HINGE FROM SOUTHCO MAKES HEAVY LIDS AND PANELS FEEL LIGHTWEIGHT

CONCORDVILLE, Pa., August 09, 2016 — Southco, Inc., a global leader in engineered access hardware solutions, has recently expanded its successful line of position control hinges with the addition of a new hinge designed to assist the lifting and positioning of heavy lids and panels. Designed with an integrated spring system, the CA Counterbalance Hinge allows a heavy lid to be lifted with minimal operating effort, and will continue to hold it securely in any position.

The CA Counterbalance Hinge features an external mounting style, allowing for increased capacity within the enclosure, and eliminates the need for secondary support components to hold lids or panels in position. Southco's CA Counterbalance Hinges can be fine-tuned to the feel of the lid or panel, eliminating the need for constant maintenance and readjustment, and offer effortless fingertip positioning and a tested, repeatable cycle life validated for 20k cycles of operation.

Global Product Manager Todd Schwanger adds, "The CA Counterbalance Hinge features a spring system designed to take the effort out of lifting and supporting lids, doors and panels by counteracting the weight of the lid, providing precise balance for ease of positioning."

For more information about the functionality of Position Control Hinges, please visit www.southco.com, e-mail the 24/7 customer service department at southco.com/contact/en, call 610-459-4000 or fax your inquiry to 610-459-4012.

Southco is the leading and trusted global source for engineered access hardware solutions, including a variety of latches, locks, captive fasteners, quick access fasteners, hinges, handles, inserts, electronic access solutions, and other accessories for applications in the networking, telecommunications, computer, automotive, aerospace, mass transit, off-highway/construction, RV/caravan, industrial machinery, marine and HVAC industries.

Southco is passionately focused on delivering customized engineering solutions and global support for its customers. The company aspires to be a virtual engineering center for its customers' engineered access solutions and is committed to providing outstanding quality and overall satisfaction. Southco's promise to its customers is to connect, create and innovate to provide the best solution for every access engineering problem. www.southco.com
