62 Compression Latch
Lift & turn series · Flush style · Adjustable grip

- Low profile
- Easy grip adjustment
- Intuitive operation

Material and Finish
Zinc alloy, powder coated or chrome plated and steel, zinc plated

Performance Details
Maximum static load: 220N (50 lbf)

Sealing Notes
* Sealing the mounting screw threads required.

Installation Notes
**Screw and lockwasher assembly M4 x 10. For door thickness greater than 3 (.11) calculate screw length using the following formula: Door thickness + 7 (.28)
***Add 0.4 (.02) to door thickness when using cup gasket

Part Number Selection
See table

Other options available. For complete details on variety, part numbers, installation and specification, go to

www.southco.com/62

Dimensions in millimeters (inch) unless otherwise stated
**62 Compression Latch**

Lift & turn series · Flush style · Adjustable grip

---

**Low profile**

**Intuitive operation**

**Material and Finish**

Zinc alloy, powder coated or chrome plated and steel, zinc plated

**Performance Details**

Maximum static load: 440 N (100 lbf)

**Sealing Notes**

Environmental sealing is achieved by using a cup gasket and sealing the mounting screw threads.

**Installation Notes**

*Screw and lockwasher assembly M5 x 16. For door thickness greater than 6 (.25) calculate screw length using the following formula:

Door thickness + 10 (.39)

**Add 0.4 (.02) to door thickness when using cup gasket**

**Accessories**

Cup gasket:
Part number: 62-973-431

**Keys**

PK-10-01
See page 90

The composite Lift & Turn latch is a light- to medium-duty latch, utilizing engineering plastic in its major components to reduce weight yet maintain excellent strength. When the lever is in the upright position, it rotates 360° to move the cam behind the support in any one of three 90° positions. Once in place, the lever closes flush with the housing, providing 5 mm of axial pull, locking the device with an over-center action.

The latch is secured into a panel by a mounting bracket that adjusts to various thicknesses. Snap-in installation is provided for 5 mm thick panels. By using cams of various offsets, different grip ranges are easily accommodated.

**Features**
- **Broad Application Range**
  Latch can be fitted to panel range 0.5 mm – 9.0 mm and has a grip range of between 10.5 mm – 49.4 mm
- **Double Action Latching & Compression**
  Allows secure fastening of doors and panels which contain gaskets and seals
- **No Adjustments Required When Fitted**
  Fixed cam design prevents incorrect grip setting
- **4 Cam Orientation Settings**
  Cam may be fitted at 90° / 180° / 270° / 360° to the latch body center line, allowing for a wide variety of mounting positions
- **Robust Polyamide Construction**
  High strength nylon is used in the main components to ensure a durable product. The material has a V2 flammability rating to UL94

**Typical Applications**
- Telecoms base station doors & side access panels
- Electrical switchgear cabinets
- Computer server racks & enclosures
- Games machine doors & panels
- HVAC control equipment enclosures
- Storage lockers on stations/building sites
- Cupboards/lockers on trains/boats/ commercial vehicles

**Parts Selection**
Latch bodies and cams are ordered separately. Choose cam based on grip range required for your application.

---

*Products identified with this symbol are stocked subject to prior sale in one or more of our global locations. If unavailable from our facility nearest you, allow for shipping time from another facility.*
**Installation**

1. Locate and orient hole with respect to handle in latched position as shown in next step. This hole orientation is preferred for all latching positions.

2. Assemble as shown.

3. Pawl should be adjusted to GRIP measurement with the door open and the handle in the LATCHED position. Use two wrenches to tighten.

---

**Material and Finish**

HANDLE and SLEEVE: Die-cast zinc (see table).

WASHER and SPRING: 302 Stainless steel, passivated.

O-RING: Buna-N rubber, natural.

LONG PIN and SHAFT: 303 Stainless steel, passivated or passivated with black oxide.

GASKET: Fibre, natural.

PAWL POSITIONING PIN: 303 Stainless steel, natural or with black oxide.

For medium style

BUISHING: Aluminum, natural or with black organic coating.

NUTS: Low carbon steel, zinc plate, chromate plus sealer.

PAWL and PAWL RETAINING CLIP: 1010 Steel, zinc plate, chromate plus sealer.

For large style

PAWL and ACTUATOR: 1010 Steel, zinc alloy plate, bright chromate plus sealer.

WASHER: 303 Stainless steel, passivated.

BUISHING: Aluminum, natural.

MOUNTING NUT: Brass, zinc plate, chromate plus sealer.

LOCKWASHERS: Spring steel, zinc alloy plate, bright chromate plus sealer.

JAM NUTS: Low carbon steel, zinc alloy plate, bright chromate plus sealer.

---

**Product Strength Guidelines**

(To assist in your product selection; samples are available for your evaluation.)

**Medium style**

Maximum static load: 670 N (150 lbs.)

Average ultimate load: 1100 N (250 lbs.)

**Large style**

Maximum static load: 890 N (200 lbs.)

Average ultimate load: 1550 N (350 lbs.)
