

NEW SPACE SAVING CAPTIVE SCREW FROM SOUTHCO ENABLES CAPTIVE FASTENING IN TIGHT SPACES

CONCORDVILLE, Pa., September 12, 2017 — Southco, Inc., a global leader in engineered access solutions, has recently expanded its Captive Screw offering with a low profile version designed for applications where installation space is extremely limited. The 52 Miniature Captive Screw Low Profile series features a 25% reduction in installation height compared with Southco's standard 52 Miniature series, enabling captive fastening in the tightest spaces.

The new 52 Low Profile series is available with a metal finish and with an over-molded head that acts as a visual indicator for access points, enabling the designer to designate access through an array of standard and custom color options. The 52 Low Profile series is available with press-in and Surface Mount Technology (SMT) options that provide versatility for fastening and unfastening. Combination tool-operated recesses and hand-tightened knurled head options provide versatility when mounting doors, panels and other hardware components in limited space applications.

Global Product Manager Jim Grady adds, "The newest addition to Southco's Captive Screw line takes up less vertical space, making it an ideal solution for applications where reduced installation height is a necessity, such as metal enclosure panels and PC boards."

For more information about the functionality of Miniature Captive Screws, please visit www.southco.com, e-mail the 24/7 customer service department at southco.com/contact/en, call 610-459-4000 or fax your inquiry to 610-459-4012.

Southco is the leading and trusted global source for engineered access hardware solutions, including a variety of latches, locks, captive fasteners, quick access fasteners, hinges, handles, inserts, electronic access solutions, and other accessories for applications in the networking, telecommunications, computer, automotive, aerospace, mass transit, off-highway/construction, RV/caravan, industrial machinery, marine and HVAC industries.

Southco is passionately focused on delivering customized engineering solutions and global support for its customers. The company aspires to be a virtual engineering center for its customers' engineered access solutions and is committed to providing outstanding quality and overall satisfaction. Southco's promise to its customers is to connect, create and innovate to provide the best solution for every access engineering problem. www.southco.com
