

NEW CABLE SPLITTER FROM SOUTHCO PROVIDES FLEXIBILITY OF ACTUATION POINTS IN ROTARY SYSTEMS

CONCORDVILLE, Pa., May 09, 2017 — Southco, Inc., a global leader in engineered access solutions, has recently added a cable splitter accessory to its successful line of Rotary Latch solutions, which allows multiple connected rotary latches to be triggered from a single actuation point. The AC Cable Splitter features built in adjustability and timed release, allowing greater flexibility in the design and integration of rotary latch systems into applications where remote latching is required.

Southco's AC Cable Splitter provides flexibility of the actuation point, allowing two connected rotary latches to be activated by one actuator, or one rotary latch to be activated by two actuators. Additionally, the Cable Splitter provides timed release, allowing one connected rotary latch to be triggered before another, or both rotary latches to be released at the same time. This is useful in entry door applications, for example, where the end user would need to open both doors on opposite sides of the vehicle at the same time, in addition to accessing either door from one side.

With its compact design, Southco's AC Cable Splitter occupies minimal space within the enclosure. Constructed of corrosion-resistant plastic, with a protective cover, the AC Cable Splitter is well suited for a broad range of challenging application environments. The AC Cable Splitter can be combined with Southco's line of mechanical and electronic actuators, rotary latches and jacketed cables for a complete rotary latching system.

Global Product Manager Cindy Bart adds, "Southco's AC Cable Splitter provides greater flexibility when designing and integrating rotary latch systems where remote latching is required. Timed release and built in adjustability make the AC Cable Splitter an ideal solution for challenging actuation points."

For more information about Southco's complete line of R4 Rotary Latching solutions, please visit www.southco.com, e-mail the 24/7 customer service department at southco.com/contact/en, call 610-459-4000 or fax your inquiry to 610-459-4012.

Southco is the leading and trusted global source for engineered access hardware solutions, including a variety of latches, locks, captive fasteners, quick access fasteners, hinges, handles, inserts, electronic access solutions, and other accessories for applications in the networking, telecommunications, computer, automotive, aerospace, mass transit, off-highway/construction, RV/caravan, industrial machinery, marine and HVAC industries.

Southco is passionately focused on delivering customized engineering solutions and global support for its customers. The company aspires to be a virtual engineering center for its customers' engineered access solutions and is committed to providing outstanding quality and overall satisfaction. Southco's promise to its customers is to connect, create and innovate to provide the best solution for every access engineering problem. www.southco.com
