

NEW HEAVY-DUTY ACTUATORS FROM SOUTHCO PROVIDE REMOTE RELEASE OF MULTIPLE CONNECTED ROTARY LATCHES

CONCORDVILLE, Pa., March 07, 2018 — Southco, Inc., a global leader in engineered access solutions, has further expanded its successful line of rotary latching solutions with the launch of two new heavy-duty, paddle-style actuators that provide multiple points of actuation, allowing two connected rotary latches to be activated remotely by one actuator.

Southco's AC-20 and R3-22 Actuators are constructed from corrosion resistant materials, making them well-suited for exterior applications that require robust performance. Available in polished chrome or black powder-coat finishes, these actuators feature a rugged, contoured paddle design for enhanced grip, key locking security and secure push-to-close functionality.

AC-20 and R3-22 Actuators are an ideal solution for doors and panels that require remote actuation of several connected rotary latches. When opening a large access panel on a piece of Off-Highway equipment for instance, the end user can easily release both latches at the same time by activating one actuator, facilitating operator entry. Combined with Southco R4 Rotary Latches and AC Cables, these Actuators create a complete Rotary Latching system, providing secure, reliable, remote latching for interior and exterior applications.

Global Product Manager Cynthia Bart adds, "With their high-strength, corrosion resistant paddle-style design, Southco's AC-20 and R3-22 Actuators provide remote release of multiple connected rotary latches for simplified access in challenging environments."

For more information about Southco's complete line of R4 Rotary Latching solutions, please visit www.southco.com, e-mail the 24/7 customer service department at southco.com/contact/en, call 610-459-4000 or fax your inquiry to 610-459-4012.

Southco is the leading and trusted global source for engineered access hardware solutions, including a variety of latches, locks, captive fasteners, quick access fasteners, hinges, handles, inserts, electronic access solutions, and other accessories for applications in the networking, telecommunications, computer, automotive, aerospace, mass transit, off-highway/construction, RV/caravan, industrial machinery, marine and HVAC industries.

Southco is passionately focused on delivering customized engineering solutions and global support for its customers. The company aspires to be a virtual engineering center for its customers' engineered access solutions and is committed to providing outstanding quality and overall satisfaction. Southco's promise to its customers is to connect, create and innovate to provide the best solution for every access engineering problem. www.southco.com
