

SOUTHCO INTRODUCES HEIGHT ADJUSTABLE DISPLAY MOUNT SERIES

CONCORDVILLE, Pa., August 3, 2017 — Southco, Inc., a global leader in engineered access solutions, has expanded its AV Display Mount offering with two new versions that allow the height of a monitor or display to be precisely adjusted according to end user preferences. The expanded AV-D32 Series includes a vertically articulating Tilt, Swivel and Swing Mount (V Series) and Dual Extension Mount (W Series) designed with Southco integrated Positioning Technology for precise control and customization of operation.

The V Series is designed with a single vertical articulating arm that provides tilt, swivel and swing positioning, and is available in wall mounted or table mounted configurations. The W Series offers the same functionality, and adds an extended range of motion with the addition of a fixed, angled lower arm. Additionally, the W Series can be horizontally mounted to a table top or mobile cart application, and is available with an optional locking mechanism to secure the height adjusting arm.

With the addition of the height adjustable feature, the AV-D32 Series Display Mounts offer the same validated cycle life and ease of operation as Southco's line of Display Mounting solutions. The AV-D32 Series is VESA compliant, provides integrated wire management channels and features a streamlined design with minimal joints for easy maintenance and cleaning.

Global Product Manager Todd Schwanger adds, "The vertically articulating design of the AV-D32 Series allows a display or monitor to be adjusted to end user height preferences, while holding displays securely in place during touchscreen operation, under vibration or when devices are mounted to uneven surfaces."

For more information about the functionality of Southco's AV Display Mounts, please visit www.southco.com, e-mail the 24/7 customer service department at southco.com/contact/en, call 610-459-4000 or fax your inquiry to 610-459-4012.

Southco is the leading and trusted global source for engineered access hardware solutions, including a variety of latches, locks, captive fasteners, quick access fasteners, hinges, handles, inserts, electronic access solutions, and other accessories for applications in the networking, telecommunications, computer, automotive, aerospace, mass transit, off-highway/construction, RV/caravan, industrial machinery, marine and HVAC industries.

Southco is passionately focused on delivering customized engineering solutions and global support for its customers. The company aspires to be a virtual engineering center for its customers' engineered access solutions and is committed to providing outstanding quality and overall satisfaction. Southco's promise to its customers is to connect, create and innovate to provide the best solution for every access engineering problem. www.southco.com
