

## NEW MICRO ROTARY LATCH FROM SOUTHCO PROVIDES STRENGTH AND SECURITY IN A SMALL PACKAGE

**CONCORDVILLE, PA., December 13, 2016** — Southco has recently expanded its successful line of rotary latching solutions with the launch of the R4-05 Micro Rotary Latch. The newest addition to the R4 Rotary Latch series provides concealed latching and increased security without sacrificing strength or functionality, making it an ideal choice for applications with significant space limitations.

The R4-05 Micro Rotary Latch allows remote actuation rotary systems to be integrated into applications where space considerations are a major determining factor. The R4-05 Micro is 60% smaller in size than Southco's smallest rotary latch, allowing packaging space or protrusion into the application to be significantly decreased. With its symmetric design, the R4-05 Micro can be mounted on either side of an application for infinite design possibilities.

Constructed of corrosion-resistant steel, these compact latches are available with cable or hand actuation, an integrated bumper feature that resists vibration, and single and two-stage latching to meet the needs of a variety of limited space applications in a variety of applications including Transportation, Industrial Machinery and Self Service industries. Additionally, R4 Rotary Latches can be combined with Southco's line of mechanical and electronic actuators and cables for a complete rotary latching system.

Global Product Manager Cynthia Bart adds, "The reduced size of Southco's newest Rotary Latch provide concealed latching for even the smallest design spaces, without sacrificing strength or functionality."

For more information about Southco's complete line of R4 Rotary Latching solutions, please visit [www.southco.com](http://www.southco.com) contact the 24/7 customer service department at [southco.com/contact/en](http://southco.com/contact/en), call 610-459-4000 or fax your inquiry to 610-459-4012.

### **About Southco**

Southco is the leading and trusted global source for engineered access hardware solutions, including a variety of latches, locks, captive fasteners, quick access fasteners, hinges, handles, inserts, electronic access solutions, and other accessories for

applications in the networking, telecommunications, computer, automotive, aerospace, mass transit, off-highway/construction, RV/caravan, industrial machinery and HVAC industries.

Southco is passionately focused on delivering customized engineering solutions and global support for its customers. The company aspires to be a virtual engineering center for its customers' engineered access solutions and is committed to providing outstanding quality and overall satisfaction. Southco's promise to its customers is to connect, create and innovate to provide the best solution for every access engineering problem.
