

NEW COMPACT ROTARY LATCH SERIES FROM SOUTHCO FEATURES DIRECT, CABLE-FREE ACTUATION

CONCORDVILLE, Pa., April 25, 2017 — Southco, Inc., a global leader in engineered access solutions, has further expanded its successful line of rotary latching solutions with the launch of the R4-10 Rotary Latch with Direct Actuation. Southco's newest rotary latch can be triggered directly via push button or lever-style actuator, without the need for a connected cable or rod. A rubber covered trigger alleviates potential noise between the latch and actuator during operation.

The R4-10 with Direct Actuation offers a simplified solution for access in applications where a short distance may exist between the rotary latch and actuator. The direct actuation design provides an additional benefit in that it allows the actuator and rotary latch to be mounted on different sides of the application.

With its compact design, Southco's R4-10 with Direct Actuation occupies minimal space within the enclosure, providing concealed latching and increased security. Constructed of corrosion-resistant steel and stainless steel, these latches are available with an integrated bumper feature, and are well suited for a broad range of application environments across industries. Additionally, R4 Rotary Latches can be combined with Southco's line of mechanical and electronic actuators and cables for a complete rotary latching system.

Global Product Manager Cynthia Bart adds, "Southco's latest addition to our R4 Rotary Latch Series accommodates short travel distances in entry door applications by providing direct, cable-free actuation between the rotary latch and actuator."

For more information about Southco's complete line of R4 Rotary Latching solutions, please visit www.southco.com, e-mail the 24/7 customer service department at southco.com/contact/en, call 610-459-4000 or fax your inquiry to 610-459-4012.

Southco is the leading and trusted global source for engineered access hardware solutions, including a variety of latches, locks, captive fasteners, quick access fasteners, hinges, handles, inserts, electronic access solutions, and other accessories for applications in the networking, telecommunications, computer, automotive, aerospace, mass transit, off-highway/construction, RV/caravan, industrial machinery, marine and HVAC industries.

Southco is passionately focused on delivering customized engineering solutions and global support for its customers. The company aspires to be a virtual engineering center for its customers' engineered access solutions and is committed to providing outstanding quality and overall satisfaction. Southco's promise to its customers is to connect, create and innovate to provide the best solution for every access engineering problem. www.southco.com
